S. N. 07/680, 074

Objections To The Drawings

Figure 1 is objected to because none of the elements including elements 1 & 5 are properly labelled according to their functions.

Figure 5 is objected to because the circle is not numerically labelled neither is its function descriptive. Elements 401 and 404 should be labelled according to its function.

Rejections To The Claims

1. The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification is objected to under 35 U.S.C. § 112, first paragraph, as failing to provided a written description of the invention.

In consideration of claims 71 and 80, the written description does not support means for <u>developing</u> color image information and character code data in a color image memory means.

Serial No. 07/680, 074 Art Unit 2612

In consideration of claims 71, 80 and 87, the written specification does not proved an adequate written description of the means for separating color image data from character code data.

- 3. Claims 71-87 are rejected under 35 U.S.C. \$ 112, first paragraph, for the reasons set forth in the objection to the specification.
- 4. Claims 72 is rejected under 35 U.S.C. § 112 fourth paragraph because it does not specify a further limitation of the subject matter in claim 71.
- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Abe teaches a first input means for inputting plural color components and a second input means for character signals.

Hudo and Shimano et al. teach separation of image data into character data and graphic data.

Serial No. 07/680, 074
